# Courses for Teachers

## Start a Run England group in your school!

Teachers, parents or other leaders can set up an official **Run England** group for students, colleagues, parents or the local community – and make a lasting contribution to their health.

To lead a **Run England** group you need to complete a Leadership in Running Fitness course. These take place regularly at venues across the country. Details and dates can be found at [www.runengland.org](http://www.runengland.org) – or enquire about hosting a course at your own school.

**For more information visit [www.runengland.org](http://www.runengland.org)**

## Certificates in Teaching Athletics

These courses are aimed at qualified and trainee teachers and those supporting the management and delivery of high quality sport and physical education in schools.

They aim to impart the knowledge, skills and confidence necessary to deliver enjoyable and engaging lessons that encourage maximum participation and increase the understanding, skills, fitness and enjoyment of children.

The courses are based on the *Aviva Elevating Athletics* teaching resource. They last six hours, including both practical and theory, and demonstrate progression across age groups in generic and athletic-specific running, jumping and throwing activities.

Courses cost £70 per participant and those attending have the option to purchase the *Aviva Elevating Athletics* resource pack or register as a member of the Aviva UKA Academy.

### Certificate in Teaching Primary Athletics

This course highlights safe and inclusive teaching methodology for primary schools. It focuses initially on developing competency in the fundamental movement skills that underpin athleticism, before examining how to apply these skills to running, jumping and throwing events.

The additional programmes and resources available to support delivery, measurement and assessment are signposted.

### Certificate in Teaching Secondary Athletics

This course builds upon what is presented in the primary resource. It focuses upon the ongoing acquisition and further development of the fundamental movement skills that underpin athleticism. It highlights progressions for students of all abilities, presenting clear technical models and safe and inclusive teaching methodologies.

The additional programmes and resources available to support delivery, measurement and assessment, citizenship and problem solving are signposted. The importance of including all children and the first steps into competition are again highlighted.

For further details of course dates and venues please visit [www.englandathletics.org/teachingathletics](http://www.englandathletics.org/teachingathletics) or contact your local England Athletics teacher education contact (see overleaf) for more information.
